

DELTA INSTRUCTIONS

Removing or Inserting the Lenses

To Remove the Lenses:

Grasp the top & center of the frame with one hand and center of the lens with the other hand.

Pull the lens down while lifting the frame up and out.

Lens should release from the center of the frame. Pull the 2 edges of the lens out from the frame.

To Insert the Lenses:

Insert the 2 tabs at the end of the lens into the outer edges of the frame. They should fit securely into the frame. Bend slightly to ensure the lenses fit securely into the frame.

Push the center of the lens up into frame until you here a click and lens is securely in place.

Removing or Inserting the Nose Piece

Removing the Nose Piece:

With thumb and index finger grasp both sides of the nose piece from the inside of the lens.

Pull away from the lens in a downward direction and the nose piece will release.

Inserting the Nose Piece:

Align nose piece with lens, grip the top of the frame with thumb and the curve of the nose piece with index finger and pull together.

Nose piece will click into place.

Removing or Inserting the Strap

Align end of strap with end of sunglass arm, insert peg into hole.

Inserting the RX Insert:

Center and place the RX insert on top of the nose piece and press down until it clicks in.
